

# COMP9323: eEnterprise Project - Overview

---

## Phases 3, 4 and 5 – Project Presentation, Peer Review and Final Demonstration

### 1. Summary

**Overall Aim:** In these phases of this course, you will be required to make a class-wide presentation of your project (Week 10); review and provide feedback to other students' work (Week 11); as well as submit and publish the final implementation of your project (Week 13).

In particular, this ultimate phase can be organised in the following parts:

#### ***Part 1. Project presentation (Week 10)***

**Part 2. Peer-Review of other Groups' Projects (11).** Each student will be required to review another group's work based on presentation given by groups on Week 10. The review structure a 1-page document addresses the following review-rubric criteria (review rubric will be released by Week 9):

- Critique of the system, stating both positive and negative attributes with an accompanying explanation;
- Comments on the API and/or UI of the system.

In all, evidence of a detailed investigation of the reviewed project is required. The feedback will be assessed based on the “*usefulness* of the review”. The review process imparts great benefit: Both, to the reviewed group providing useful feedback; while to the reviewer it provides a meaningful learning experience in understanding how to thoroughly probe, test and appropriately critique a system.

**Part 3. Final Demo (Week 13).** Finally, a demonstration of your working project is required. In essence, we would expect you to outline the following during your demo:

- To describe the main objective of the project, and demo it's main features;
- Provide a detailed but concise description of your final implemented tool, showcasing its main implemented features preferably via use of an example;
- Expect to answer questions related to features and it's implementation;
- Additionally, we look at clarity of code (e.g. comments, readability, lightweight code docs, such as JavaDoc or Swagger provided); and
- Quality of deployment instructions.

2. **Marking Scheme and Submission Deadlines and Instructions will be available next week.**
